

Shroton
or Inverkeithing
Church
Entrance to Courtney Cottage

Friday Night, I got to the campsite
at about 8:00 I set up my tent
with help from Gary ~~but I did~~
~~not learn of his name until Saturday~~
I put my things inside, set my bed
up and went out to the
pub I met most of the team
apart from the ~~students~~ students.
I did not say much apart from
awkward things people asked me
and talking to Chris and Karin.

None of the students talked to me
so I went straight to bed.

Saturday started off well I got up
at ~~7:00~~ half seven had
some breakfast with Henry
and walked down to Chris's
caravan.

We drove off to Cambridge
and got the lunch, and then
we set off for the site
we arrived at the bottom of
a gradual slope we walked over
with Chris telling me about the
site.

~~when arrived~~ when we arrived
I was ~~there~~ showed round
by Sue and then started work
with Helen.

First we just trawled all over
the trench then I scraped around
the smaller stone right at
the main one, I ~~was~~ had to
redraw it as it was a bit bigger

This revealed after Scrapping.

He rowling got a bit boring
but I really liked doing the
channings.

I really liked the hole day.
That night I got on with every
one and slept badly.

ot

Sunday was a nice day, when
we arrived I was shown
the stones found yesterday
next to the wash stone
So I guessed ~~they~~ they might
be ramping stones and could
come out the other side so
Helen and I started scraping
away we found some stones
coming out, I was very pleased
and this made me very happy.
I worked here for the rest of the
day, but for some of the time
I was eating lunch drinking tea and
had a ~~short~~ short look around
but over lunch I got to
know every one much better.
Over all I really enjoyed the day.

ot

Day 3 Sunday —

Me and one of the girls
scraped the edge of the section
of the trench until her dad
came then I worked on my
own that lead on till lunch
after lunch I scraped away
around the stone to the
bottom right of the main stone
so they could lift it easily
which was a bit boring but
I said I could not just do
all the fun things and really
get in to it.

After eating ^{cakes} and drinking some tea
I went off with Matt and Hanne
It was nice to get to see
other sides of the settlement
and looking at it at a different
way, and that was very interesting
overall all I really enjoyed the day.

Tuesday started off by digging a
hole some few meters away
from hut 23 to see if the
very interesting cobbles go any further
that way.

We found some stones but
they were not cobbles but
they could be used to see
the difference as they were
close in size.

After lunch I went off with
Chris and Wayne to look at
the huts to see the size,
if we can see an entrance I
found this similar to working on the
walls but more diffused.

After Tea I help dig and
shovel.

wednesday

first I looked round with
Matt & Henry showing us what
they had done with the walls
then I went off and sat on
one of the bigger and higher
stones and looked at the views
as others did the diary and
paperwork we did this up
until lunch.

Then I went up to Hut 23
which we think might not
be a hut I worked around
the main back stone and
then I stood up the floor
I like working with muck
but it was really different
~~compared~~ compared to the stone
row.

After Tea I went off with
Matt, Henry, Chris and some others

so we could do an over
all survey for cleared spaces
huts walls and more which
really like know.

Then Henry, Me and two others
walked over Roughton and
Brown Willey.

we started walking in the valley
between the settlement and
Brown Willey up and over it
up Roughton on the top of
both was very misty it was
like being in the clouds

Thursday is our day of
the ^{some 4 people plus}
Henry get together and drive
off to Tintagel and Boscastle
which was really nice
but I have been there
before both and set on the
cast but Boscastle is a bit
nice within the town than
in Tintagel.

at

Friday My last day
at me I did at the stone
Row up until tea was
made and started we
wanted but needed was two
feathers we found one post
hole and the other I did
not know but in the ~~later~~
second I found a tiny amount
of charcoal which could be
helpful.

we did not do much after
tea apart from finish rowing
it down and watch it drain out
it was a very slow day but
very cold.

After we had a lovely spread
set out near the tent
and we had lots of ~~visitors~~
visitors which we watched
the sun go down with. 11
